CARLOS ANDRADE
Engineering in Computer Science

PROFESSIONAL PROFILE

Professional with extensive experience leading the development and implementation of strategic technological projects. Expert in the planning and execution of initiatives that guarantee the optimization of computing resources and the maximum satisfaction of end users. I stand out for my ability to coordinate technical support activities at the national level, providing comprehensive solutions to incidents and requirements of computer systems and internal applications. Additionally, I have strong development skills, having designed and implemented web and backend solutions using technologies such as PHP, MySQL, Bootstrap and API. I am able to solve complex problems related to business logic and performance optimization, which allows me to provide efficient and high-impact solutions to the needs of the organization.

EXPERIENCE

2022 NIPRO Medical Corporation - Present (In-Person)
Position: Analyst IT
Main responsibilities and achievements

- I developed the website and corporate dashboard using technologies such as PHP and MySQL, improving the company's digital presence.
- I provided national technical support, both remotely and in person, to the company's users and clinics, guaranteeing the continuity of their operations.
- I managed the company's documentation, optimizing information management processes.
- I performed updates and support to internal applications, ensuring their correct functioning.
- I worked with the SAP BUSINESS CLIENT system, demonstrating my ability to adapt to different business tools.

2023 LIBELULASOFT - (Remote)
Position: Backend developer
Main responsibilities and achievements

- I designed and implemented backend solutions using PHP and the YII2 framework, demonstrating my mastery of these technologies.
- I solved complex problems related to business logic and performance optimization, providing effective solutions.
- Developed custom functions to improve the efficiency and functionality of applications, highlighting my programming skills.
- I successfully completed tasks under time constraints, maintaining high quality standards in my work.

2021 SIDEVOX S.A (Intern)
Position: Web Developer
Main responsibilities and achievements

- I developed the frontend of the business website using technologies such as Bootstrap, Java and HTML, improving the company's digital presence.
- I implemented both the frontend and the backend of a web application for sending mass messages, integrating a third-party API (SparkPost) and using PHP, Bootstrap and PostgreSQL.
- I created a user interface for both clients and administrators, optimizing the usability and functionality of the application.

2020 Mayorga Mechanical Projects Position
Position: Web Developer
Main responsibilities and achievements

- I developed the company's website using PHP, which served as a digital portfolio of its services.
- I acquired the hosting and domain services necessary to host and publish the website.
- I deployed the website, ensuring its correct implementation.
- I implemented SEO (Search Engine Optimization) strategies to improve the company's web positioning.

2019 PSYCHOLUDIC
Position: Web Developer
Main responsibilities and achievements.

- I developed a website for the management of doctors, diagnoses, offices and appointments, optimizing the organization's processes.
- I implemented differentiated interfaces for administrative users and end users, improving the usability of the system.
- I used technologies such as PHP and MySQL for development.
- I deployed the application on a local server using the XAMPP platform, ensuring its correct implementation.
